## Final Proposal for Executive Board

I will support goals and objectives set through the Southwest Mosquito Abatement and Control District (SWMACD) scholarship while completing the communication internship program at Utah Tech University. My goals and objectives include but are not limited to: designing flyers and brochures to raise public awareness about mosquitoes, data management of current records, incorporating resources for teaming building and leadership through books, podcasts, discussions, and activities, and increasing communication with Utah Tech University to allow for more access for future students to the SWMACD scholarship.
